In his lecture Dr. Glen T. Martin discussed the Ideologies of world parliament as a democratic non-military government based on establishing peace and solving environmental problems.

He stated that "Human Beings are influenced by the system in which they live in and hence begin to think in terms of those systems. Two existing dominant institutions in this world are Global Capitalism and system of sovereign nation states. All are concerned about equality and justice of all the people in this world. Nobody should be left behind."

He shared his thoughts on The *Earth Constitution* as it is designed not only to establish world peace and environmental sustainability while eliminating global poverty and misery, it is also designed to empower planetary citizenship everywhere, creating a framework for dialogue and debate such that our collective human intelligence will be immeasurably enhanced and our human potential significantly actualized. He then explained the Ten Principles of Global Ethics and World Citizenship and stated that, it is high time to ratify the *Constitution for the Federation of Earth*. Students also asked few questions and interacted with Glen Martin. The event ended with vote of thanks delivered by Prof. Narasimha Murthy.
